## EXISTING SEWAGE DISPOSAL SYSTEM IDENTIFICATION FORM

I, \_\_\_\_\_ current owner of proposed parcel(s), certify that to the best of my knowledge the existing sewage disposal system is completely contained on-lot, or if any portion of the system is located and/or drains off-lot, I will provide a legally recorded easement for that portion of the sewage disposal system. The location and type of sewage disposal system is depicted on the Minor Subdivision Application Sketch Plan.

TYPE OF SEWAGE DISPOSAL SYSTEM (**check only one (1) of the following**):

- Septic Tank and Drainage Tile
- Septic Tank and Leach Field
- Septic Tank and Subsurface Sandfilter

Owner's Signature and Date: \_\_\_\_\_

NOTE:

The Henry County Board of Health and the Planning Commission **strongly** recommend having the sewage disposal system location and type verified, or the system should be upgraded to meet current standards. This form is not required for parcel(s) with **no existing sewage disposal system**. This form may also not be required if the existing sewage disposal system permit can be verified by the Henry County Health Department.
